Objective

Computer Science graduate skilled in full-stack web development (MERN/Vue) with hands-on experience integrating AI APIs and building data-driven dashboards, seeking a Software Developer Intern role to contribute to building tools across the venture capital ecosystem.

Technical Skills

Languages: JavaScript/TypeScript, Python, C++
Frontend: React.js, Next.js, Vue.js 3, Tailwind CSS
Backend: Node.js, Express.js, MongoDB, REST APIs, JWT Auth
AI/ML: Google Gemini API, PyTorch, TensorFlow, NLP-based Parsing, Prompt Engineering
Tools: Git, Docker, Cloudinary, Postman, Recharts

Education

Sukkur IBA University Sukkur, Pakistan
Bachelor of Science in Computer Science 2022 – 2026
CGPA: 3.68/4.0 *STHP Scholar (Merit-Based Fully Funded Scholarship)*
Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems, Software Engineering, Machine Learning, Enterprise Application Development, Information Security.

Experience

Full Stack Developer Intern 2025
Elevo Remote / Pakistan
– Built JobTracker, a full-stack MERN job application platform with automated CV parsing, KPI dashboards, and JWT authentication delivered as part of production internship work.

Web Developer Intern 2024
Sindh Empowered Oasis Sindh, Pakistan
– Developed and maintained 2 responsive WordPress websites with custom themes and plugins, collectively supporting 500+ weekly active users.

Projects

Solar Panel Segmentation via Self-Supervised Learning | *Flask, React.js, Docker, PyTorch, Linux* FYP 🧠
– Designed a multi-service architecture with Flask backend, React.js frontend, and Dockerized ML inference pipeline enabling real-time predictions via REST API.
– Benchmarked 5 self-supervised models; BYOL + U-Net achieved 93.38% IoU and 96.56% Dice Score as best-performing configuration.

HEALR – Medical Drug & Test Search Platform | *React.js, Node.js, Express.js, MongoDB* 2025 🧠
– Built a full-stack MERN health platform with live search across 5,000+ medical entries, cart management, and appointment scheduling.
– Designed secure RESTful APIs with database pagination and filtering, improving client-side responsiveness by 25%.

PrepAI – AI-Powered Interview Preparation Platform | *Next.js, TypeScript, Express.js, MongoDB, Gemini API* 2026 🧠
– Built a full-stack SaaS platform integrating Google Gemini API for automated resume analysis and AI-driven mock interview feedback.
– Implemented JWT authentication, Cloudinary resume uploads, and a Recharts analytics dashboard for performance tracking.

GharKaKhazana – Full-Stack E-Commerce Platform | *Vue.js 3, Pinia, Tailwind CSS, Node.js, Express.js, MongoDB* 2025 🧠
– Built a full-stack e-commerce platform for a home-based food business with product catalog, cart, and order management.
– Implemented state management with Pinia and responsive UI with Tailwind CSS, connected to a Node/Express/MongoDB backend.

Research

Research Co-Author & Conference Presenter May 2026
IEEE ICOMET 2026 International Conference
– Co-authored and presented IEEE-published research on CNNs vs Vision Transformers for image manipulation detection, focusing on classification-localization trade-offs in forensic AI systems.
– Findings revealed that CNNs outperform Vision Transformers in localization tasks while ViTs demonstrate stronger classification performance – highlighting a fundamental architectural trade-off for forensic AI systems.

Certifications & Achievements

Certifications: Google AI Essentials – Coursera (2026) | Google Advanced Data Analytics – Coursera (2026) | Google Prompting Essentials – Coursera (2026) | Python and Django – University of Michigan (2024) | Web Development – IBM (2024)

Achievements: PM Laptop Scheme Awardee (2025) | STHP Merit Scholarship – Fully Funded BS Degree | Executive Member, CS Society, Sukkur IBA University | Hackathon Volunteer
